

Experience

Morgan Stanley

Jun 2026 - Sep 2026 | Glasgow, Scotland

- Risk Analyst Intern

Synthesising unstructured, real-time open-source data (OSINT) to model the impact of macroeconomic and geopolitical shocks to the firm. Integrating and building agentic AI workflows, utilising autonomous agents to detect complex market patterns. Investigating complex trading behaviours and execution logic across global markets.

Radsuite

Dec 2025 - Apr 2026 | Dallas, USA

- Software Engineer

Architected and deployed a self-hosted GitLab platform using Docker Compose for persistent storage and easy command setup. Designed a cross-LLM collaboration platform allowing multiple people to work on the same project and be able to use a variety of LLMs. Implemented reproducible, one command environments and validation checks, reducing setup time by 80%.

Tenora

Sep 2025 - Dec 2025 | London, England

- Software Engineer

Built and refined a 12-month FX CFaR model, using Monte Carlo simulations to quantify unhedged vs hedged currency exposure. Developed an AI-powered image to CSV pipeline that takes financial data from uploaded documents, decreasing data entry time by 95%. Designed logic to translate multi-currency cash flows into home-currency risk distributions, enabling clear downside risk metrics.

LexTrack AI

Jun 2025 - Sep 2025 | New York, USA

- AI & Automation Intern

Developed and deployed ML models to analyse 10,000+ legal documents which improved data extraction speed by 60%. Collaborated with data scientists and legal experts to improve automation workflows using Python and OpenAI APIs. Built an AI-powered compliance tool that helped reduce annual contract review time by 40%.

Plantforce Ltd

Jun 2024 - Sep 2024 | Bristol, England

- Engineering Intern

Used CAD software to design and prototype 24 new components which have now been deployed over 4000 times. Coordinated lean principle adoption, decreasing wasted products by 20% through the implementation of JIT. Increased overall output by 8% by using probability analysis to predict both frequency and fatality of potential issues.

Education

University of Manchester | BSc in Mathematics with Finance GPA: 4.0

A*- A-Level Mathematics | A - A-Level Economics | A - A-Level Business

Relevant Coursework: Financial Accounting, Corporate Finance, Investment Analysis, Risk Management, Quantitative Analysis, Mathematical Modelling, Optimisation, Computational Modelling, Machine Learning, Data Structures & Algorithms, Software Engineering, API Development, Cloud Computing, Cybersecurity, Data Analysis

Skills

Programming: Python (NumPy, pandas, matplotlib, SciPy), R (ggplot2, dplyr), C++ (basic), SQL, Git | Mathematics & Statistics: Probability Theory, Linear Algebra, Stochastic Calculus, Time Series, Analysis, Statistics, Optimisation | Data Science & ML: Statistical Modelling, Regression Analysis, Forecasting, Data Visualisation, Feature Engineering, Clustering | Tools & APIs: OpenAI API, Google Cloud, Jupyter, Excel, CAD Software | Technical Abilities: Data Cleaning, Simulation, Monte Carlo Methods, Algorithm Design

Projects

- Founder of Transaction Automation Software | Jun 2025 - Present

Designed and developed a platform for small businesses to manage, track and approve customer transactions. Built core features including secure login, role-based access, real-time status updates, and monthly transaction summaries. Responsible for full product architecture, UI design, and user workflow implementation.

- Founder of Postinvested | Apr 2024 - Aug 2024

Initiated the creation and acquisition of over 130 content posts, significantly expanding the platform's offerings. Achieved a notable 35% increase in post pricing, reflecting increased value and demand. Cultivated a diverse global user base, attracting participants from 9 countries.

- Financial Algorithm Developer | Feb 2022 - Aug 2023

Invited to present the algorithm at the London Investors Show, resulting in 4 paid demonstrations showcasing data collection methods. Developed a financial algorithm using R (ggplot2) to analyse stock market trends, generating actionable insights for investment strategies. Achieved profitability in 9 of 11 months, with the highest monthly return reaching 7%.

- Acting and Modelling | Jun 2021 - Present

Featured in the Netflix series The Witcher and movie Higher Ground, Amazon Prime's Maxton Hall, Disney+ Star Wars The Mandalorian. Participated in the John Lewis 2025 Christmas Advert. Collaborated on the BoohooMAN 2024 film collection, Manchester City's 2025 collection.

Achievements

- Morgan Stanley Future Generations Scholarship

1 of 25 in the world to be awarded the future generations scholarship.

- Cambridge University BioHackathon

Built an LLM called 'GOLLM' using GSEA outputs and the QuickGO API to summarise ontology results. Project 'GOLLM' featured in paper on large language models for automated gene ontology summarisation.

- Umushroom Investment Competition

17th place in biggest investment competition in UK with over 1000 investment teams. Created and deployed financial model using R that returned 84% over 2 months.

- J.P.Morgan Investment Banking Programme

Built a discounted cash flow model and analysed capital structure dynamics for M&A transactions. Secured 1st place delivering a winning strategic pitch directly to BDO's executive leadership on ideas supporting underprivileged students.

- 100 Mile Ultramarathon

Completed 100-mile ultramarathon in 27h 38m with 3682m elevation gain.
